DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-4, 8, are drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:2, classified in Class 536, subclass 23.5.

Group II. Claims 5-6, 7, are drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:4, classified in Class 536, subclass 23.5.

Group III. Claims 9-11, are drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:19, classified in Class 536, subclass 23.5.

Group IV. Claims 9-11, are drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:34, classified in Class 536, subclass 23.5.

Should any one of the Groups from I-IV be elected, Applicant is required to select one polypeptide (one amino acid sequence) as set forth in SEQ ID NO:2, 4, 19 or 34. Once one polypeptide sequence is selected, all other sequences will be withdrawn from consideration.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV, are independent and distinct, each from the other, because they are products which possess characteristic differences in structure and function and each has an independent utility, that is distinct for each invention which cannot be exchanged. The polynucleotides of inventions I-IV can be used to make hybridization probes or can be used in gene therapy as well as in the production of the specific proteins of interest. The polynucleotide of Group I can only be used to produce the protein of SEQ ID NO:2 but not the proteins encoded by the polynucleotides of Groups II-IV.

Art Unit: 1646

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
